An Update on Falun Dafa Worldwide

VOLUME 1 ISSUE 1-1 APRIL 4, 2006

WOIPFG: Report on Human Organ Harvesting from Live Falun Gong Practitioners

(Clearwisdom.net) The *World Organization to Investigate the Persecution of Falun Gong* (WOIPFG) has confirmed in their investigations that the Sujiatun District Traditional Chinese Medicine Hospital in Shenyang City, also known as the Liaoning Province Thrombosis Treatment Center of Integrated Chinese and Western Medicine (the Thrombosis Hospital for short) had set up an unlawful crematorium to burn the bodies and destroy evidence of illegal organ harvest. The existence of a huge live human organ bank in the Shenyang City area has been verified. The live harvesting of organs for transplants from unlawfully-detained Falun Gong practitioners was found not only in the Sujiatun area but also in many other places throughout China.

As an eyewitness pointed out, the Thrombosis Hospital was the place where organs of Falun Gong practitioners were harvested while they were still alive. According to our investigation, although a funeral parlor exists in the Sujiatun District, human bodies indeed have been cremated inside the hospital boiler. Some people involved in this gruesome process of burning bodies have collections of rings and other belongings from the corpses.

The China International Transplantation Network Assistance Center (CITNAC) at the China Medical University in Shenyang City guarantees one month and no longer than two months of waiting time for liver transplants. The waiting time to find a proper kidney is only one week, at most one month. If a problem arises during surgery with the provided kidney, they will guarantee another one in less than one week. Because the kidney source for this possible emergency also needs to match tissue type of the recipient, it is almost impossible to get a match from an executed prisoner or someone who died from an accident. The only likely source comes from a spare organ bank. Considering that a kidney has to be transplanted within 24 hours, supplies at the spare organ bank must come from living people. Taking into account tissue type matching and other factors, the truth is that a spare live human organ bank with a quite huge cardinal number for tissue type matching and harvesting is in operation at any time.

CITNAC attracts patients around the world. In 2004, more than 100 Japanese patients received organ transplants in Shenyang City alone. From 2003 to 2005, more than 3,000 South Korean citizens went to China for organ transplants. *Voice of America* has reported on a person in Vancouver who is conducting international business in kidney transplants and has arranged for many Canadian patients to travel to China for kidney transplant surgeries.

Introduction to Falun Dafa

Falun Dafa, also known as Falun Gong, is a practice for benefiting physical health and elevating the mind. The practice consists of five gentle exercises including meditation, and diligent effort on the part of practitioners to follow the universal principles of Truthfulness-Compassion-Forbearance in daily life. Falun Gong is not only beneficial to one's own health and well-being, it also benefits others. Although the practice originated in China, today it is practiced throughout the world by people of all races and walks of life. In the face of the most brutal and vicious persecution perpetrated on them by the Chinese Communist Party, Falun Gong practitioners have found the spiritual strength to resist peacefully and tirelessly by upholding the principles of Truthfulness-Compassion-Forbearance.

About Clearwisdom

Clearwisdom.net is the most authoritative source of information about the practice of Falun Gong and about the persecution of Falun Gong in China, reporting timely news and events happening inside China as well as from the more than 70 countries around the world where Falun Gong is practiced. Clearwisdom responsibly publishes the experiences and understandings of practitioners themselves, who submit the majority of the articles.

New Witness: There Are Dozens of Similar Concentration Camps

(Clearwisdom.net) After the first two witnesses exposed the Sujiatun atrocities, another witness who identified himself as "a veteran military doctor in the General Logistics Department of the Shenyang Military Region" stepped forward to point out that the Sujiatun Concentration Camp indeed exists, organ harvesting and cremation of bodies is done routinely there, and some people are even cremated while still alive. He stated that the Sujiatun hospital is only one of 36 similar concentration camps.

This witness said the camp in the Jiutai Area, Jilin Province detains over 14,000 Falun Gong practitioners.

The veteran military doctor indicated, "From the information I have access to, the largest concentration camp is in Jilin Province. The concentration camp code named 672-S imprisons over 120,000 people. "

According to witness, the Chinese Communist Party's Central Committee agreed to treat Falun Gong practitioners as "class enemies" and to handle them in any economically beneficial manner without having to report to higher authorities. In other words, Falun Gong practitioners, like many prisoners in China, are no longer regarded as human beings, but as raw materials for commercial products.

Falun Gong Has Given Me a New Lease on Life

(Clearwisdom.net) I am a resident in Hebei Province of China. Before I started practicing Falun Gong, I suffered from severe chronic bronchitis. I was tormented by it since my early 50s. In fact, I was so ill that I couldn't continue farming. Every cloudy or rainy day, I would pant and gasp for air. For the past few years, I continued to suffer even though I took medicine up to six times a day. I had to carry the medicine bottle with me at all times. I even put the bottle next to my pillow when I went to bed so that I could reach it when my bronchitis surfaced.

In addition, I suffered from hemorrhoids and prostatitis. I was prone to heat exhaustion in the summer and colds in the winter. I also frequently suffered from nasal congestion. These ailments had been tormenting me for years. I felt I was struggling with death and often felt I was on the verge of a nervous breakdown.

I started practicing Falun Gong in the spring of 2005, just when I was in complete despair. Because of Falun Gong cultivation practice, the ailments that had been tormenting me subsided little by little. In less than two months, I could go without any medicine because I had become completely healthy. From the bottom of my heart, I feel the magnificence and miracle of Falun Gong. It is Falun Gong that has saved my life. More importantly, I now have a completely different view on life and worldly pursuits. Because of Falun Gong, I now know the truth of life. I am able to see the light and hope of life.

This is a brief summary of my cultivation practice over the past year. Through the past year of cultivation practice, my health and character have been greatly enhanced.

United Kingdom: Press Conference to Expose Sujiatun Atrocities Opposite the Manchester Chinese Consulate

(Clearwisdom.net) Falun Gong practitioners from Manchester and surrounding towns held a press conference outside the Chinese Consulate on March 28, 2006. The aim was to protest and to inform the public and media about the Sujiatun Concentration Camp. They outlined the inhuman lengths to which the Chinese Communist Party (CCP) is prepared to go to carry out former CCP leader Jiang Zemin's order to "eradicate" Falun Gong.
